

# Global Equity Portfolio

## Investment Objective

The Chartis Asset Management Global Equity Portfolio aims for long-term capital growth by investing in a diversified portfolio of global equities across various sectors and geographies. Leveraging a value-investing philosophy and fundamental analysis, the portfolio employs both top-down and bottom-up strategies to identify undervalued securities with strong growth prospects. With exposure to sectors like Technology, Financials, Healthcare, Energy, and holdings in broader market indices, the portfolio balances growth and risk. It seeks to outperform the Bloomberg World Large, Mid & Small CAP Return Index over the medium to long term through disciplined asset allocation and active management.

## Global Equity vs Benchmark

Performance Summary - Cumulative

Returns shown above are based on lump sum investments. Past performance is not indicative of future results. The value of investments, including income derived from them, may fluctuate due to changes in market conditions, underlying asset values, and interest rates. This means the value of your investment may increase or decrease over time. All performance figures are net of investment management fees and taxes unless stated otherwise. Performance figures for periods longer than one year are annualized. Investing in the fund may not be suitable for all investors. It is strongly recommended that investors consult with their financial adviser to ensure the fund aligns with their investment goals and risk tolerance before making any investment decisions.

## Portfolio Manager Comments

Global equity markets delivered mixed performance during November as global growth momentum moderated and trade tensions continued influencing investor sentiment. Despite this, improving financial conditions and stable inflation trends supported equity valuations. The portfolio remained positioned toward companies with strong earnings resilience while maintaining diversification across regions and sectors.

## Top Equity Holdings
